It helps streamline the creation, organization, and distribution of relevant content, complete with a step-by-step workflow to ensure consistency, clarity, and measurable results. Works best with SearchGPT so it can pull in relevant information.

Instructions for Variable Replacement: Before running the prompt chain, replace the placeholder variables {PRODUCT\_NAME}, {TARGET\_AUDIENCE}, {KEY\_GOALS}, {CONTENT\_FORMATS}, and {CONTENT\_PILLARS} with your actual details

Usage Guidance: (Each prompt is separated by ~, make sure you run them separately, running this as a single prompt will not yield the best results. You can pass that prompt chain directly into tools like Agentic Workers to automatically queue it all together if you don't want to have to do it manually.)

Reminder About Limitations: This prompt chain provides a structured blueprint for content strategy planning. However, it may not account for all context-specific factors like competition, resource constraints, or evolving market conditions. Always review and refine the outputs to align with your brand's unique circumstances.
